

Artistic Revolution in **your** cabin

artnjet.com

A little more **Soul...**

Until recently, the complexity of aeronautics didn't allow the existence of Art onboard any aircraft. That's why Art&Jet came to life. To offer something truly unique : **a real bridge between Art and Aviation.**

Art&Jet is simply the only Art Consultancy service dedicated to aircraft interiors.

We help you to achieve what no one else does : **allow real Art inside your aircraft interior.** No artistic decoration, but Art certified for aviation and authenticated by the Artist.

Do you want to infuse a bit **more soul** in the main cabin or add a touch of elegance to the bedroom? From **Digital Art** curated for you and displayed on your screens, to small / loose **artworks** embellishing your sideedges, or bigger art pieces judiciously integrated: our core activity is to create **collaborations** between Artists and the wonders of aeronautics.

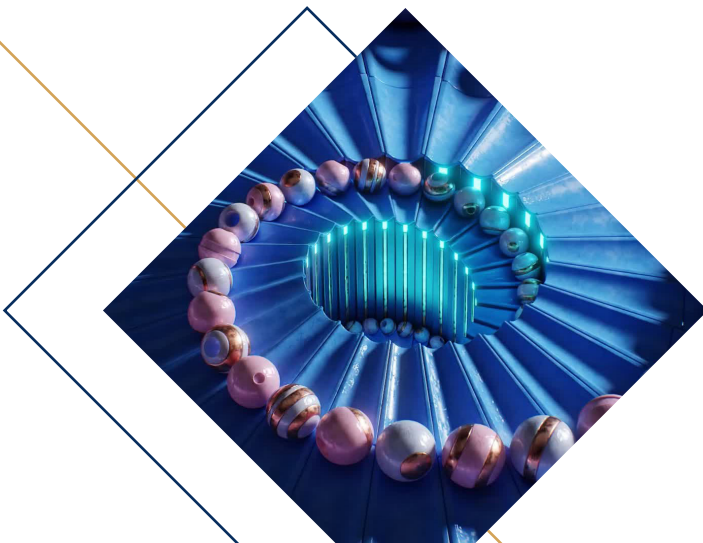

Our proposal is also a smart investment.

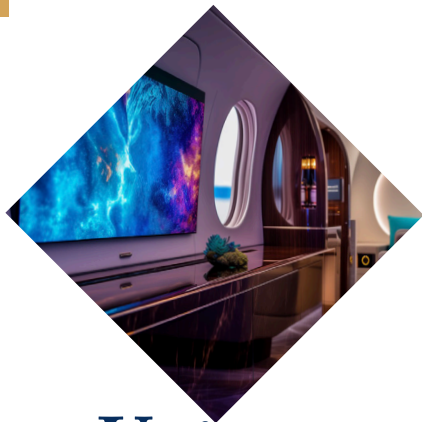

We help creating artworks which can be removed, installed in other environments (home, office, yacht...) or sold. Each of them will be a versatile and valuable addition to your collection, that can be enjoyed for years to come.

At Art&Jet, we pride ourselves on tailoring a truly **luxurious** and **innovative offer** that makes a real difference. We invite you to experience the beauty and elegance of our concept and see for yourself why we are the only choice for aircraft owners who demand the very best.

Contact us anytime to schedule a free consultation.
